

## **The “Heather” Advantage**

Is your property a great candidate for DRONE photography as part of my marketing plan? Advantages:

- Encompassing high aerial shots with map style views showcasing the entire property and land.
- Medium aerial shots that capture all angles of the home, it's layout, features, and property line.
- Low elevated shots that give a unique and slightly raised angle of the property that typical property photography cannot.
- The neighborhood and surrounding area, including the home's proximity to amenities.
